

# Contributing to CORD

Welcome to the CORD Contribution Guide! Thank you for your interest in contributing to the project. This guide is aimed at those who are interested in contributing to the CORD Project, whether it be code, documentation, tests, or other resources.

As in the case with any on-going project, these docs may fall out of sync with the project, but we'll try our best to keep them accurate. Please consider helping us keep these documents up-to-date.
