

Upgrade OpenStack Brigade

Brigade Goals and Scope

The overarching goal is update the version of OpenStack (and Ubuntu) running on the CORD Platform, but do so in a general way that makes it easy to customize a POD to whatever IaaS service(s) the operator wants to support. Expected tasks include:

- Upgrade OpenStack/Ubuntu versions that are part of the CORD platform
- Generalize Build Process to account for this degree of freedom
- Bring OpenStack instantiation into (under) XOS control

Brigade Leads

- Dhanunjaya Vudatha, Radisys <dhanunjaya.vudatha@gmail.com>
- Zack Williams, University of Arizona <zdw@cs.arizona.edu>

Brigade Members

- Hyunsun Moon, SKT <hyunsun.moon@gmail.com>
